JOSE LEON ROJAS

Product Builder | Product Design, Front-End & Shopify Development

noelsajor@gmail.com | noelsajor.com | linkedin.com/in/jose-leon-dev

PROFILE

Multidisciplinary Product Builder working across product design, UI/UX, front-end engineering, Shopify, and AI-assisted development. Turns business requirements, product ideas, and approved concepts into responsive, production-ready digital experiences - from flows, prototypes, and design systems through implementation, QA, optimization, and launch. Brings a long visual-design foundation together with hands-on web implementation, e-commerce delivery, performance optimization, and cross-functional collaboration.

CORE CAPABILITIES

Product & UX
Product Design | UI/UX Design | User Flows | Wireframing | Prototyping | Figma | Responsive Design

UI Systems
Design Systems | Component Libraries | Interaction Patterns | Developer Handoff | Figma-to-Code

Front-End
HTML | CSS | JavaScript | TypeScript | React | Next.js | Astro | Tailwind CSS | Git/GitHub

Commerce
Shopify Online Store 2.0 | Liquid | Theme Development | Theme Customization | Metafields & Schema

Delivery
Web Performance | Core Web Vitals | Accessibility-Aware UI | Responsive QA | SEO Basics | Analytics | AI-Assisted Development

EXPERIENCE

IOTEK - UI/UX Design & Front-End Implementation (official title: Graphic Designer) 2026-Present

Work across brand, product UI, responsive web implementation, and digital production for a multi-division IoT company. Translate business and product requirements into reusable visual systems and production-ready digital experiences. B2B IoT build: developed a bilingual production website and supporting brand system across UI/UX, front-end implementation, visual systems, and delivery.

AscentMgnt - Front-End / Shopify Developer 2025-2026

Built and optimized production Shopify storefronts including NUUD Pleasures, Strike Brands, Nationwide Fabric, and Ben Exotics. Developed Liquid sections, schema settings, reusable components, responsive product/storefront interfaces, UX improvements, analytics/SEO enhancements, and web-performance optimizations. NUUD Pleasures: contributed to a full redesign and optimization associated with +79% sessions, +1,100% total sales, +42% orders, and +21% conversion rate; Lighthouse 96 Performance, 97 Accessibility, 92 SEO; Mobile FCP 0.8s, TTFB 0.5s.

Persistence Labs - UI/UX Designer 2024-2025

Designed responsive product interfaces, interactive Figma prototypes, and reusable design-system components; prepared developer-ready handoff and optimized production assets for implementation.

Citriom Software - UI/UX Designer 2022-2025

Redesigned complex internal/government-facing software interfaces and workflows; built design systems, reusable component libraries, and consistent interaction patterns supporting implementation.

Energi Core - UI / Visual Designer 2021-2022

Designed responsive websites, landing pages, product visuals, visual systems, 3D illustrations, animations, and brand assets.

BittEx IT Solutions - Graphic Designer 2017-2018

Developed branding systems, marketing assets, and digital campaign materials, establishing the visual-design foundation later applied to product and interface work.
